Detailed Energy Audit	Express Energy Audit
<p>Objective of the detailed energy audit is to <b>identify practically implementable energy saving solution</b> within the plant. This is a very detailed exercise and majority of the recommendations would have an acceptable <b>payback of 3 months to 15 months.</b></p>	<p>Objective of the express energy audit is to identify <b>total energy saving potential</b> of the plant and in the process <b>identify easily possible energy saving solution.</b></p>
<p>Detailed Energy Audit consists of visit by our team of B.E.E. certified Energy Auditors, Senior Engineers and Measurement technicians and concludes with submission of <b>detailed Energy Audit Report.</b></p>	<p>Express Energy Audit consists of visit by our team of B.E.E. certified Energy Auditors and Senior Engineers and concludes with onsite presentation and <b>brief visit report.</b></p>
<p>Various phases are onsite visit for measurements, discussions, analysis, presentation and offsite work for detailed report preparation.</p>	<p>It primarily consists of onsite visit for walk-through audit, discussions, basic analysis and presentation. A brief visit report is also submitted.</p>
<p>It can last from anywhere between <b>20 days</b></p>	<p>It can last from anywhere between <b>2 days and</b></p>

<p><b>and 70 days</b> (including Report submission) or more depending on the size of the plant, location, scope etc.</p>	<p><b>5 days</b> depending on the size of the plant, location, scope etc.</p>
<p>A plant could expect <b>5% to 12% savings</b> on energy bills depending on various factors.</p>	<p>A plant could expect <b>around 1% saving</b> on energy bills depending on various factors. More importantly the plant will get an insight into total energy saving potential.</p>
<p>Is recommended for energy-intensive plants with a load of 5 MVA and above which have not carried out Energy Audit for the last 2-3 years.</p>	<p>Is recommended for plant of any size which is planning for detailed Energy Audit either for the first time or just interested in understanding the basic energy saving potential.</p>

**ENERCO ENERGY SOLUTIONS LLP** (estd. 2009) is India's most experienced and reputed Energy Saving and Solar Power Company. Clientele –
